1. Informasi Umum

1.1 Base URL

```
https://alghazaly.erri.online/api
```

1.2 Request Headers

Header	Nilai
Content-Type	application/json
Accept	application/json
Authorization	Bearer {token} (untuk endpoint yang memerlukan autentikasi)

1.3 Format Autentikasi

API menggunakan Laravel Sanctum (token-based). Login untuk mendapatkan token, lalu sertakan di setiap request yang memerlukan autentikasi.

```
POST /api/login
{ "email": "admin@alghazaly.sch.id", "password": "password" }

// Response
{ "token": "1|abcdefg...", "user": { ... } }

// Penggunaan
Authorization: Bearer 1|abcdefg...
```

1.4 Format Response

Semua response menggunakan format JSON:

```
// Success
{
  "message": "Data berhasil diambil",
  "data": { ... } // atau array []
}

// Error
{
  "message": "Unauthenticated.",
  "errors": { "field": ["pesan error"] } // hanya untuk 422
}
```

1.5 Format Pagination

```
{
  "data": [ ... ],
  "meta": {
    "current_page": 1,
    "last_page": 5,
    "per_page": 15,
    "total": 72
  }
}
```

Query params pagination: ?page=1&per_page=15

1.6 HTTP Status Codes

Status	Arti
200 OK	Request berhasil
201 Created	Data berhasil dibuat
204 No Content	Data berhasil dihapus
400 Bad Request	Request tidak valid
401 Unauthorized	Token tidak ada atau expired
403 Forbidden	Tidak punya izin untuk resource ini
404 Not Found	Data tidak ditemukan
422 Unprocessable	Validasi gagal – lihat field "errors"
500 Internal Error	Kesalahan server
